Basic Capture and Archive (BCA) package

Purchased in conjunction with your STI mobile training event, with content captured during your STI bioskills hands-on session. Ideal for building a foundational surgical procedural library.

Key Features:

- On location video capture of proctor-led training sessions utilizing feeds from up to 6 cameras or imaging devices.
- GDPR and HIPAA compliant technology
- Time stamping for post-production editing to ensure seamless step-by-step presentation of procedure from multiple feeds
- AI-powered bookmarking and captions.

Deliverables:

- Single, high-quality, multi-feed, English language, procedural video per bio-skills event, up to 1hr duration (download transfer to your server).
- Client branded, video hosted on the mSTI archive/library available to mobile lab event registered attendees, as well as all mSTI registered HCP members.

Cost: $1500
